

Paxton Ingredients Dispensers

A range of ingredients dispensers to ensure rotation of ingredients, to avoid spillage and to prevent cross contamination.

- Flow rate restriction plate, adjustable to suit different ingredients
- Translucent material gives replenishment level indication
- Recessed panel for identification labels
- Hinged transparent front lid
- Rotationally moulded for rigidity, strength and durability

Suitable for food processing ingredients and additives, salt and sugar storage and ideal for bench top use in the bakery environment.

Material: Translucent food grade MDPE (Medium Density Polyethylene) (optional food grade material).
